

Golf Challenge Assembly & Safety Instructions

- 1.) Select a level area to operate game with plenty of room to allow for a line to form a safe distance between player and spectator(s).
- 2.) To assemble framework, insert the straight pieces of pipe in the "Tee" fittings and then form the sides and top using the "Elbow" fittings and more straight pipe.
- 3.) Attach the painted canvas to the framework assembly using the Velcro straps.
- 4.) If using the game outdoors, it is strongly recommended to use the stakes provided on either side of the bottom supports. (Use sandbags on pavement or in a breeze.)
- 5.) Never fold up canvas when wet - allow to dry thoroughly.

Safety Instructions

- 1.) Be sure there is plenty of clearance between the player and the spectator(s). Remember, the risk is always present that the player could lose their grip on the golf club and it would go flying backwards. Also the type of injuries which occur from being struck by a golf club in mid-swing are often severe; prevent this from happening by assuring a safe distance between player and spectator(s).
- 2.) Keep spectator(s) clear from the sides and back of the painted canvas to prevent them from being struck by a deflected or errant hit.
- 3.) Always use stakes when using the game outside. If the game is on pavement, use sandbags.
- 4.) Never use the game in strong winds or lightning!!!
- 5.) Use caution when setting up or taking down the game. Until the canvas is attached the sections of pipe can come apart and fall down causing injury.
- 6.) Use only the soft golf balls that are included with the game.
